The logo

Use the logo wherever it fits, the mascot on its own where space is tight, and the icon where a form asks for a square image. Leave at least one eye's width of space around every mark, and keep the mascot 16px or larger.

How to write about us

Our names

Construct Computer	The product, at construct.computer. Write it in full in titles, in listings and the first time you mention it.
Construct	Our lead agent, who hands work to the rest of the crew, and the product's short name once its full name has come first.
Hypervoid Inc.	The company that makes Construct Computer, in San Francisco.
Avoid	Construct AI, ConstructComputer, Construct.Computer and Construct Computers.

Construct Computer is not Construct 3, the game engine, or The Construct, the robotics school.

Descriptions

One line

Bylines, link lists and anywhere a sentence fits. 21 words

Construct Computer gives you a crew of AI agents, each with its own computer, that take on work and finish it.

Short

Meta descriptions and directory summaries. 155 of 160 characters

Construct Computer is a crew of AI agents with their own computer. Ask in plain words and they research, sort your inbox and send reports. From $9 a month.

Listing

Product Hunt, app stores and short directory fields. 242 of 260 characters

Construct Computer is a crew of AI agents that work like hires. Each has its own computer, browser and apps, so it can research, sort your inbox, send reports and build small tools while you get on with your day. Free to try, from $9 a month.

Overview

Press boilerplate, G2 and Capterra. 83 words

Construct Computer is a crew of AI agents that work like hires. Ask in plain words and the right agent plans the job, works on its own computer and browser, uses the apps you connect, and tells you when it's done. It works in the web app, Discord, Telegram, Slack, email and voice calls. It's free to try, and plans start at $9 a month. Ankush Singh and Nischal Naik started Construct Computer in 2026, and Hypervoid Inc. makes it in San Francisco.

Detailed

Articles, reviews and newsletters. 176 words

Construct Computer gives people and small teams a crew of AI agents in place of a single chat assistant. You ask in plain words, and Construct, the lead agent, hands the job to the agent suited to it. Each agent has its own computer in the cloud, with a browser, a terminal and Files, and uses the apps you connect, from Gmail, Calendar and Notion to GitHub and any MCP server.

Work keeps going without you. Jobs run on a schedule with your laptop closed, a job done once in chat can be saved as a workflow anyone can run again, and agents build small apps for your team when you ask for one. They learn from your chats, and you can read and correct everything they remember.

You can reach your agents in the web app, in Discord, Telegram and Slack, by email and on a voice call. Ankush Singh and Nischal Naik started Construct Computer in 2026. Plans are $9, $49 and $259 a month, and every new account can try it free first.

Subject: An AI crew that keeps working after you log off

Hi,

If your week is full of research, inbox sorting and reports nobody has time for, this is worth ten minutes.

Construct Computer gives you a crew of AI agents that work like hires. Each one has its own computer, browser and the apps you connect, and jobs run on a schedule, so the work gets done while you're away.

It's free to try, and plans start at $9 a month: YOUR-LINK

About the partner program

Questions writers ask

What is Construct Computer?

Construct Computer is a crew of AI agents that work like hires. Ask in plain words and the right agent plans the job, works on its own computer and browser, uses the apps you connect, and tells you when it's done.

Who makes Construct Computer?

Ankush Singh and Nischal Naik started it in 2026. Hypervoid Inc. makes it in San Francisco.

Is it the same as Construct 3 or The Construct?

No. Construct Computer is not Construct 3, the game engine, or The Construct, the robotics school. Write the full name, Construct Computer, when you list or link to us, so readers and search engines find the right one.

How is it different from a chat assistant?

A chat assistant answers you in a thread. Construct's agents take a job and finish it on their own: they work on their own computer and in your apps, run on a schedule, and tell you when they're done.

Does it keep working when my laptop is closed?

Yes. Agents run in the cloud, so scheduled jobs and long work carry on after you close your laptop, and the results wait in the chat.

Which apps and places does it work with?

Gmail, Calendar, Notion, GitHub and hundreds more, plus any MCP server by its address. You can reach your agents in the web app, in Discord, Telegram and Slack, by email and on a voice call.

Can a team share it?

Yes. A team shares one crew, with owners, admins and members, and its own plan. Your Personal chats and memory stay yours, and you choose which of your connected accounts each team can use.

What does it cost?

Every new account can try it free. Lite is $9 a month, Starter $49 and Pro $259, each for less when paid yearly, and Starter and Pro have 7-day trials.

Using our brand

Do

- ✓ Use the files as they are
- ✓ Write Construct Computer in full in titles, listings and first mentions
- ✓ Keep your own brand more prominent than ours
- ✓ Leave at least one eye's width of space around the logo and the mascot

Don't

- × Stretch, rotate, outline or recolor the files
- × Redraw the mascot, change its eyes or give it a mouth, arms or legs
- × Use our names or the mascot in your own product, company, domain or handle
- × Suggest that we sponsor or endorse you

Construct Computer, Construct, the mascot and the crew are trademarks of Hypervoid Inc. You're welcome to use these files to refer to us: to list, review, write about or link to Construct Computer, to show that your product works with it, and in affiliate posts. Don't use them in your own product, company or domain name or social handle, to suggest that we sponsor or endorse you, or on merchandise, without asking us first. Keep your own brand more prominent than ours, and don't stretch, recolor, rotate or redraw the logo or the mascot. We may update these files or withdraw permission for a particular use at any time.
